Assignment-3

CS698F Advanced Data Management

Medha Atre
IIT Kanpur

Due Oct 17, 2016 23:59

1 Description

Submit a progress report of your course project in the format of the following two components.

1.1 A short written report

This written report in the PDF format should contain the following main components:

- **Course project objective:** In one paragraph of about 20 lines, describe the goal of your course project.

- **Things done until now:** In a section, give a detailed description of what has been accomplished by you until now. This can include regeneration of the previously implemented method and their results, or any of your own partial implementations and results.

- **Things remaining to be done:** In this section give details of what is remaining to be done.

- **Any evaluation results (if available):** If you are at the stage of evaluating your course project implementation, then include the evaluation results, and the kind of metrics you have used for evaluation.

1.2 Code for the course project

As a zip file submit the intermediate code of your course project that is in running condition. For instance, if you are doing a project on distributed system, then setting up that system and data on it, and any part of the query processing that has been done. Include a detailed "README" file giving instructions of how to setup and run your code. Our TA and I will evaluate this code.

2 Submission

The above components are supposed to be submitted via the Canvas interface `https://canvas.cse.iitk.ac.in`. **Any assignment submission done over email will not be accepted, and will be given zero marks.**
