How are course contents so far?

What can be improved in CS698Y?

- Nothing – Shubham (Response to 1st point OK, I was expecting solutions/suggestions)
- More focus towards explaining critical take away points, to get a better overall picture.
- I think weekly questions/problems (1 or 2) regarding the topics covered in that week can be helpful.
- Everything seems perfect from prof side. Need to improve our time distribution on courses. (Niketan: Too kind to me)

What can be improved in CS698Y?

- As of now, the course structure is good. I don't think any immediate changes are needed. I just need a week time maybe to adapt to the semester – Karteek

- Its a tendency of students to nod whenever asked weather they understood the concept or not. (Does IITK pay extra for doing that ☹)

- some of the discussion are left for students to find the answer and most of the time students are too lazy to do that. (Your feedback on you ☺)
