Stack test program

```
import java.io.*;
import StackObject;

class stackDriver{
   public static void main(String[] args) {
      StackObject s = new StackObject(10);
      StackObject t = new StackObject(10);
      Integer j = null;
      Integer x = null;
      System.out.println("starting...");
```

Stack test program

```
      for(int i=0;i<10;i++){
         j = new Integer((int)(Math.random() * 100));
         s.push(j);
         System.out.println("push:  " + j);
      }
      while(!s.isEmpty())
         System.out.println("pop:  " + ((Integer)s.pop()));
      System.out.println("Done :-)");
   }
}
```
